S/N	Product/ Solution Name	Description	Time frame
01	Website Development and Maintenance for Prime Bank PLC.	We Fully Complied the Scope mentioned below and as per requirements from Prime Bank PLC end	➤ Pre-project for Website : 02 Working Days ➤ Project Initiation : 02 Working Days ➤ Dev and Customization : 61 Working Days ➤ Quality Assurance : 10 Working Days ➤ User Acceptance Test & Bug Fixing : 10 Working Days ➤ Go-Live : 02 Working Days ➤ Training : 02 Working Days ➤ Project Close-Out : 01 Working Day Total Project Duration : 90 Working Days

The website will contain the following modules and functions, and it may be updated/changed on PRIME BANK PLC. requirements	Vendor's Feedback (FC, PC, NC, NA only)	Comments
1. Homepage 2. CMS (Laravel) 3. Role Based 4. Download and Upload 5. User Friendly Administrative Panel 6. Responsive 7. Category wise Services 8. Search 9. Mega Menu 10. Loan/EMI Calculator 11. Video Gallery 12. News and Events 13. Photo Gallery 14. Social Networking	FC – Fully Comply	Messenger based Live Chat : Currently, Facebook does

The website will contain the following modules and functions, and it may be updated/changed on PRIME BANK PLC. requirements	Vendor's Feedback (FC, PC, NC, NA only)	Comments
15. Search Engine Friendly 16. Contact us 17. Browser Compactable 18. FAQ 19. Enquiry/Feedback 20. Branch Location 21. Messenger based Live Chat 22. Award and Certification 23. Banner 24. Web/Push Notifications 25. Newsletter 26. Career 27. Foreign Exchange Rate 28. E-Tender Section (PDF Based) 29. Corporate Social Responsibilities 30. The whole site should be accessibility features enabled. Features include text size modifications, monochrome, invert colors, big cursor, link highlight, show headings, reading guide, reset button and screen reader through a widget. (sample - https://a2i.gov.bd/a2i-missions/digital-financial-inclusion/) 31. Website should be bilingual (English and Bangla)		not permit the integration of Messenger-based live chat directly into websites. However, we can incorporate a WhatsApp icon as a third-party solution. When a visitor clicks on the icon, they will be redirected to the WhatsApp application to initiate a conversation.

S/N	Details Business requirement	Vendor's Feedback (FC, PC, NC, NA only)
1	Navigation Links: A conspicuous menu of links on the bank website design allows users to figure out the overall structure of the website and go directly where they need to. Important navigation links include a log-in portal, an about us page, and links to categories: About Prime Bank, Corporate, Consumer, CMSME, Treasury, FI & OBU, Climate Strategy, Sustainable Impact, Neera & Woman Empowerment, Investor Relationship, Career	FC – Fully Comply
2	Site Search: On-site search at navigation panel instead of navigating through multiple links or pages on the site, make sure users can type what they are looking for into a search box, and let the search algorithm do the digging for them.	FC – Fully Comply
3	Financial Calculators: Calculators provide users with answers and recommendation based on information that's unique to their personal circumstances. They provide a self-service option that delivers results instantly and takes personalization to the next level. The following calculators are required in the HOME PAGE: -Personal Loan EMI Calculator -Car Loan EMI Calculator -Motorcycle Loan EMI Calculator -Fixed Deposit Benefits Calculator -Home Loan EMI Calculator -DPS benefits Calculator -Rewards Point Calculator	FC – Fully Comply
4	ATM and Branch Location Maps: Interactive Map using GPS to locate customer's location and the location of nearest ATMs/CRMs and Branches/Sub-Branches with Route Map.	FC – Fully Comply
5	Payment Portal: Today's customers like to conduct everyday transactions online, from sending money to friends and family to paying bills. Our website must include a portal that makes payments quick and easy.	FC – Fully Comply (The Payment Portal is linked with Bank's online Banking)
6	Security: The site must be fully secured.	FC – Fully Comply

7	Accessibility: The webpage must be accessible by general population including disables. This is now international best practice to include disabled population. The loading time of the website should be amongst the lower in the industry and the downtime should be less than 0.05%.	FC – Fully Comply (Website downtime may depend on Hosting Service)
8	Serving the customer expectation: The webpage must provide all the necessary and available services to its visitors: Apply for accounts, loans, credit cards, sale of prepaid cards, make online, mobile and electronic payments, make cross-border payments, get market information and transactional data, avail ‘customized’ advisory services, receive customer service through live (and WhatsApp and video) chatting services, get support in wealth management and investment services, furnish adequate and attractive info to investors.	FC – Fully Comply
9	Side-bar Navigation: This should include “Quick Access” to apply for bank account, access to Social Media accounts and videos on the bank products and services in YouTube.	FC – Fully Comply
10	Navigation Bar Icons: The following icons are required in the Navigation Bar: MyPrime, Priority, PrimePay, Search Bar, and ATM/CRM/Branch/Sub N Branch Locator.	FC – Fully Comply
11	Offers for You: Offers for specific groups to be listed here with visuals (posters maybe) and with mention of key features (details linked).	FC – Fully Comply
12	Need Help?: A list of support available will be provided here: -Call Center Direct (call directly from WhatsApp or phone) -Chat with Customer Manager: WhatsApp -AI Chat -Live Video with Customer Service -Online form to seek support -Drop your phone number for the Customer Manager to call you -Environment and Social Risk Management Online Help Desk (form based) for Corporate and SME Clients	Currently, Facebook does not permit the integration of Messenger-based live chat directly into websites. However, we can incorporate a WhatsApp icon as a third-party solution. When a visitor clicks on the icon, they will be redirected to the WhatsApp application to initiate a conversation.
13	What’s new?: List of new items in transitional move.	FC – Fully Comply
14	News Flash: The webpage opens with a news flash popped up on screen.	FC – Fully Comply
15	Highlights: Only banking, economy, and market related news and information.	FC – Fully Comply

16	Access to Prime Bank Research: Interface between Knowledge Hub's Articles only and this tab under Investor Relations.	FC – Fully Comply
----	---	--------------------------

Subject: Technical Proposal

- A. Company Profile
- B. Bidders Qualification all documents
- C. Proposed Technology

Proposed Technology

Item/Specification	Requirements	Vendor's Feedback
Application Server or Web Server	Apache / Nginx / Node.js or Similar	Apache
Operating System for Application/Web Server	RHEL Latest compatible version	ALMA Linux
Database	PostgreSQL/MySQL/ NoSQL latest compatible version (Preferred license free database)	MySQL
Operating System for Database Server	RHEL Latest compatible version	ALMA Linux
Backend	Node.js/ Python/ Java/ Go/ PHP	PHP-Laravel Framework
Client Sided Scripting Languages and Techniques	HTML 5 , Bootstrap CSS3 , JavaScript (ES6+)	HTML 5 , Bootstrap CSS3 , JavaScript (ES6+)
Frontend Framework	React / Angular/ Vue.js/ Symfony/ Laravel	Laravel
Server Specification	Provided by Solution Provider for both cloud and on-premises	Cloud
Website Maintenance	Provided by Solution Provider	Aamra will provide
API Design	RESTful	RESTful

Item/Specification	Requirements	Vendor's Feedback
Overall Requirements	Design Principles, UX / UI, Client, Version Control	FC – Fully Comply
Monitoring & Logging	Ensure monitoring and error logging through standard tools. Please specify the tools.	Grafana
Page Load Speed	Define target load times for key pages.	~ 5 Sec
Analytics	Integration with analytics tools like Google Analytics should be specified for tracking user behavior.	Google Analytics
Responsive and Interactive	The website must be responsive and adapt to various screen sizes (desktop, tablet, mobile) for better user experience.	FC-Fully Comply
Content Delivery Network (CDN)	Specify for faster content delivery and reduced server load.	Cloudflare
Architectural Requirements	Error Handling, Exception Handling, Vulnerability Protection, Data Security, Scalability, Technology Compatibility e.t.c	FC-Fully Comply
Containerization	Preferably Docker-based deployments.	FC-Fully Comply
Admin Panel	Secure backend interface for managing the site.	FC-Fully Comply
Caching Strategy	Server-side, client-side, and database query caching.	FC-Fully Comply
SEO optimized	Ensure on-page SEO standards are followed.	FC-Fully Comply
Browser Compatibility	Ensure a wide variety of browsers (Chrome, Firefox, Safari, Edge, and their mobile versions)	FC-Fully Comply
Accessibility	The webpage must be accessible by both general population including the disabled. This is now international best practice to include disable population	FC-Fully Comply

Technical Requirements(IT)

		Vendor's Feedback				
S/N	Description	Fully Complied	Need Customization	Workaround Available	Cannot Customize	Comments
	Integration					
1	Solution should have capability to login by AD authentication and regular authentication for Admin User	Fully Complied				
2	API request & response must be encrypted & required to follow Prime Bank API Check List	Fully Complied				
	User Interface					
3	Scheduler should have ability to configure dynamically and also be configured by front-end.	Fully Complied				
4	Vendor must need to provide a solution which should have different role based dashboard.	Fully Complied				
5	Any type of approval (creation/modification/delete) must have multiple control like maker ,checker.	Fully Complied				
6	Vendor has to ensure the centrally monitoring all the audit logs and activities.	Fully Complied				
7	Vendor has to give us a solution which should allow multiple teams/user to deploy, monitoring and administering related works.	Fully Complied				
8	Vendor has to give us a solution which should have a panel for monitoring service wise audit trails and also any type of administering, deploying audit trails.	Fully Complied				
9	System Should have standard Audit Trail Report/Module	Fully Complied				
	User Administration					
10	User Creation/modification/lock/unlock from a panel	Fully Complied				

S/N	Description	Vendor's Feedback				
		Fully Complied	Need Customization	Workaround Available	Cannot Customize	Comments
11	User Management (Role Based access control)	Fully Complied				
12	Granting multiple Roles to a single user	Fully Complied				
13	Must have multiple control like maker ,checker for user creation/Authorization/Update/Inactive etc.	Fully Complied				
14	Two Factor Authentication for Login if Bank Decide	Fully Complied				
	Customization					
15	System should support to do the customization and add new business process/logic/ data entry screen and change existing process by trained bank users.	Fully Complied				
	Architecture					
16	Vendor has to configure the load balance of service as per PBL requirement. It can be both software or Hardware load balancer.	Fully Complied				
17	vendor has to propose a solution which should support latest OS and other related software's updated patch which will release time to time by OS and software vendor like Microsoft, oracle, Linux etc. and also solution should run after vulnerability mitigation where vulnerability may raise by vulnerability assessment tools, audit and PBL Information security division.	Fully Complied				
18	Stress Testing & Load Testing report must need to submitted by vendor during product implementation for both Application and middleware service.					Paid Service
19	Identified VAPT must be mitigate by vendor at any time without any cost.	Fully Complied				
20	Minimum security baseline (msb) should be comply by vendor	Fully Complied				

S/N	Description	Vendor's Feedback				
		Fully Complied	Need Customization	Workaround Available	Cannot Customize	Comments
21	Prime Bank audit risk assessment, BB audit observations and any external audit observations must need to mitigate by vendor at any time without any cost.	Fully Complied				
22	Solution should have ability to grow horizontally during load.	Fully Complied				Price may vary
23	Solution should have capabilities to access through Internet and intranet.	Fully Complied				
24	Vendor has to provide resource requirements for all required server like Number of Cores, Memory (GB) and Storage (GB).	Fully Complied				
25	Vendor must need to give a detail technical architecture diagram for Live, HA, UAT and DR environment	Fully Complied				
26	The system should support a smooth transition from primary site (DC) to backup site (DR) for disruptive events such as fire, flood, earthquake, etc.	Fully Complied				
27	Vendor must need to support database retention and purging as per Prime Bank policy.	Fully Complied				
28	Vendor has to provide the List of all the pre-requisite software needed by the product (e.g., database, JDK, JRE, any other licensed software) and also need to confirm which we need to procure or not for the solution.	Fully Complied				We may need to purchase software which will discuss later
29	Vendor must need to give us web server, database and other related tools/ component lists if needed.	Fully Complied				
30	Does your product support SaaS, customer-managed, and hybrid deployments?			Workaround available		
31	How does your platform support continuous integration and deployment practices?	Fully Complied				

S/N	Description	Vendor's Feedback				
		Fully Complied	Need Customization	Workaround Available	Cannot Customize	Comments
32	Does the solution support zero downtime patching and updates?	Fully Complied				
33	Vendor solution must need to Ability to deploy in VM/Container environment	Fully Complied				
34	The system should provide the facility to take backups of data and system software at user defined intervals with minimal/without operator intervention. The system should allow these backups to be both: (a) full - a complete image of the data and/or software (b) Interim - a backup of transactions or changes which have been made since the last backup.	Fully Complied				
35	Vendor must need do prepare Live, HA, test, HA and DR environment setup, configuration related work	Fully Complied				
36	Vendor solution must need to ensure details log so that any transaction can be easily identified.	Fully Complied				
37	The unique identifier must be introduced for every log so that the log can be trace easily for every request.	Fully Complied				
38	The log must be compressed on a daily basis and automatically shifted to other locations.	Fully Complied				
39	Vendor must provide full hardware sizing.	Fully Complied				Cloud Solution
40	Vendor solution must be hardware platform independent i.e. should be run on any hardware platform.	Fully Complied				
41	System should be capable to handle latest Database.	Fully Complied				
	Installation, Configurations and Post deployment support					
42	Vendor must have to provide step by step detail installation guideline	Fully Complied				

S/N	Description	Vendor's Feedback				
		Fully Complied	Need Customization	Workaround Available	Cannot Customize	Comments
43	Vendor must install and configure the full solutions in Live, DR and UAT environment.	Fully Complied				
44	Vendor has to implement Software or Hardware (If bank provides) load balancer with clustering features in live environment	Fully Complied				
45	Vendor has to configure solutions with SSL certificate which will support only latest TLS.	Fully Complied				
46	Vendor must apply security policy in each server. Primarily we will refer PBL Security Base-line like PCI-DSS.	Fully Complied				
47	Vendor has to ensure a process which should periodically patch update of Operating System and database all patches	Fully Complied				
48	Vendor must need to provide a detail plan for post deployment support.	Fully Complied				
	Guides					
49	Installation / Implementation guide: Vendor has to provide an installation guide mentioning details of installation & parameter value setup at OS during product implementation.	Fully Complied				
50	Vendor has to provide detail data dictionary as per prime bank requirement	Fully Complied				
51	Vendor must need to provide setup and configuration related detail document	Fully Complied				
52	Service Development guide: Vendor has to provide a guideline for integration with new service provider with business logic implementation and validations.	Fully Complied				

S/N	Description	Vendor's Feedback				
		Fully Complied	Need Customization	Workaround Available	Cannot Customize	Comments
53	Administration guide: Vendor has to give an administration guide where detail information about application logs, system logs, temporary file locations, performance monitoring scripts/commands and system maintenance guidelines are incorporated. It should include high level definition of process flow. Also administration guide should include standard operating procedure (SOP) for system administration.	Fully Complied				
	Training					
54	Vendor should have provide training for different module.	Fully Complied				
55	Vendor should have provide detail technical, administrative, operational and others related training so that PBL can manage by themselves.	Fully Complied				
56	Vendor should have provide training materials for all module.	Fully Complied				
57	Must need to give third party library list with information details	Fully Complied				
58	Application deployment architecture diagram with HA and DR consideration	Fully Complied				
59	Application deployment environment set up document step by step	Fully Complied				
60	Live server readiness document step by step	Fully Complied				
61	Application architecture detail diagram	Fully Complied				

S/N	Description	Vendor's Feedback				
		Fully Complied	Need Customization	Workaround Available	Cannot Customize	Comments
62	Following documents need to provide : 1. SRS 2. Code oriented technical document 3. Deployment document 4. Release document 5. Code review 6. Audit Log document 7. Data Dictionary and other related documents need to handover time to time as per bank requirement. Please note that above are only development related			Workaround Available		
63	All Framework, libraries and tools must be updated	Fully Complied				

Technical Requirements(ISD)

S/N	Description	Vendor's Feedback				
		Fully Complied	Need Customization	Workaround Available	Cannot Customize	Comments
1	Ensure Audit Trail & details User Activity Report with Timestamp, Date, IP address, Mac Address etc.	Fully Complied				
2	Password Guideline					
	a. Passwords for user-level shall be at least eleven (11) characters long, whereas	Fully Complied				
	for admin-level passwords shall be at least twelve (12) characters long	Fully Complied				
	b. Passwords must contain both upper- and lower-case characters (i.e., a-z, A-Z);	Fully Complied				
	c. Passwords must contain digits and/or special characters/punctuation	Fully Complied				
	d. Password should be changed on first time login	Fully Complied				
	e. System should have capable to send password through email/SMS etc.	Fully Complied				
3	The application must have fine-grained RBAC for Access control	Fully Complied				
4	The application must have Multi-factor authentication (MFA) for admin/users accessing sensitive modules in the Application, and related systems.	Fully Complied				
5	The application should encrypt data at rest to protect it from unauthorized access.	Fully Complied				
6	The application should encrypt data during transmission to protect it from interception or tampering. Use protocols like	Fully Complied				

	TLS (Transport Layer Security) [version 1.2 and higher] for secure communication.					
7	The Application should have the capability to mask or obfuscate sensitive information (e.g., credit card numbers, personal identification details) to prevent unauthorized users from viewing sensitive data, while still allowing analytical queries.	Fully Complied				
8	The Application should Anonymize or pseudonymize personally identifiable information (PII) to protect privacy and ensure compliance with data privacy regulations of ICT ministry of Bangladesh.	Fully Complied				
9	The Application should apply data redaction techniques to hide or remove sensitive information before it is processed, accessed, or shared.	Fully Complied				
10	The Application should apply Tokenization techniques to protect privacy and ensure compliance	Fully Complied				
11	Application should support inputter-authorizer concept as where applicable.	Fully Complied				
12	Session time out period should be set	Fully Complied				
13	Ensure SQL Injection prevention	Fully Complied				
14	Password should not be hard coded in any application	Fully Complied				
15	Password brute forcing must be prevented	Fully Complied				
16	Username enumeration must be prevented	Fully Complied				

17	A denial of service using automatically locked accounts must be prevented	Fully Complied				
18	User generated session-ids must be rejected	Fully Complied				
19	Session-cookies must be transmitted via HTTPS	Fully Complied				
20	The secure flag must be set on the session cookies	Fully Complied				
21	Sessions must be revoked if the session-id is not received via HTTPS	Fully Complied				
22	A session-bound token must be validated for each POST request	Fully Complied				
23	Application must be able to protect itself from various application vulnerability issues.	Fully Complied				
24	Application must be able to protect itself from Cross Site Scripting Attack	Fully Complied				
25	Click jacking, CSRF should be handled by Application	Fully Complied				
26	Denial of Service Prevention should be handled	Fully Complied				
27	System should have file sanitization mechanism for handing file upload features	Fully Complied				
28	Stored data, logic programming problems, displayed contents that reveals sensitive information etc. must be protected.	Fully Complied				
29	Session Hijack - shall be handled	Fully Complied				
30	SSRF: User-submitted URLs fetched from remote sources must be validated.	Fully Complied				
31	Ability to encrypt passwords and other sensitive data based on industry-standard encryption mechanisms.	Fully Complied				

32	The application should ensure mitigation of OWASP Top 10 Web vulnerabilities.	Fully Complied				
33	The application should implement AI poisoning protection and model validation to prevent adversarial attacks.	Fully Complied				
34	The application should ensure Input Validation and Sanitization - To prevent injection attacks (e.g., SQL injection, cross-site scripting).	Fully Complied				
35	The application should ensure that all activities are logged securely with access controls.	Fully Complied				
36	Application shall comply with the Latest OWASP “Application security guideline”	Fully Complied				
37	API (if any) shall comply with the OWASP API security guidelines & bank’s API security checklist.	Fully Complied				
38	The Application should protect API access with rate limiting, authentication, and authorization to prevent data from being accessed inappropriately via APIs.	Fully Complied				
39	The API calls should follow secure coding practices and minimize exposure of sensitive data.	Fully Complied				
40	The solution should have capabilities to integrate with on-prem SIEM solution.	Fully Complied				
41	The solution should have capabilities to integrate with on-prem PAM solution.	Fully Complied				
42	The Application should maintain detailed logs of all user actions.	Fully Complied				

43	All the logs should be retained as per policy	Fully Complied				
44	The Solution should have capability to do regular backups of the application to ensure business continuity in the event of data loss or corruption.	Fully Complied				
45	The Solution should establish disaster recovery plans to quickly restore data and minimize downtime if a breach or attack occurs.	Fully Complied				
46	SLA should be set for breach notification.	Fully Complied				
47	Latest Framework (Application & Database) will be preferable.	Fully Complied				
48	Supported Browser (should be independent)	Fully Complied				
49	Any kind of System notification by Email, SMS, Dashboard to System Administrator? System should be capable to have Email, SMS Notification to All kind of Users; In addition, System Should have a Comprehensive Dashboard also.	Fully Complied				
50	How will the bank approach if any BUG is detected during Post Live operation? How the Change request will be attended by vendor?					If a bug is found post go-live, the bank reports it, we will fix it as per SLA. For change requests, the bank submits a request, we will analyze, gets approval, then implements

						it following proper procedures.
51	Application should be responsive from any device (desktop/laptop/mobile/tablet /or any other devices).	Fully Complied				
52	What will be the Deployment Model (On-premises or cloud)? If cloud, then where the data will be stored.					Cloud Local/Offshore
53	In case of platforms container-based approach, “ Application Container Security Guideline ” by NIST shall be ensured	Fully Complied				
54	The Application should comply with regional data privacy laws for customer data storage and processing.	Fully Complied				
55	The Application should adhere “ICT Security Guideline version 4.0”, “Cyber Security Compliance framework” & “Cloud Security Guideline” by Bangladesh Bank, “Data protection regulations” by ICT Ministry of Bangladesh and implement security controls that align with these requirements.	Fully Complied				
56	The Application should adhere PCIDSS and ISO 27001 and implement security controls that align with these requirements.			Work around Available		

Bidders Qualification

S/N	Provided by Prime Bank PLC	Aamra's Feedback
01	Must be a Bangladeshi firm having up-to-date valid Trade License, BIN and Tax payment certificate must be up to date.	Fully Complied and attached documents
02	Must have 10 (Ten) years of experience in developing website	Fully Complied
03	Must have experience working with minimum 3 reputed Banks and Financial organization. Must attach their Work Order with proposal as proof.	Fully Complied
04	Should have minimum 10 (Ten) full time ICT personnel in company payroll related to system analysis, design, development integration, testing, training and Implementation of web and mobile based application/software/solution/Digital Services/e-learning applications.	Fully Complied
05	Customer List of similar tasks with URL.	Fully Complied and attached documents

Cloud Server Solution

Server Type	Configuration
Primary Server	➤ vCPU – 4 ➤ vRAM – 8 GB ➤ System Disk (SSD) - 50 GiB ➤ Bandwidth – 5 TB Monthly ➤ Dedicated Control Panel ➤ Security Firewall : Cloudflare ➤ SSL Certification Enabled

Secondary Server	➤ vCPU – 2 ➤ vRAM – 4 GB ➤ System Disk (SSD) - 25 GiB ➤ Bandwidth – 4 TB Monthly ➤ Dedicated Control Panel ➤ Security Firewall : Cloudflare ➤ SSL Certification Enabled
------------------	---

Maintenance and Service Support

- System monitoring (uptime, performance)
- Database backup and optimization
- Security patches and updates
- Bug fixes and issue resolution
- Performance tuning and load testing
- Compatibility testing (browsers/devices)
- Analytics/report accuracy check
- API/license renewal tracking

Support Service Schedule

Our Response Time Matrix for Maintenance Service					
Priority Level	Type	Description	Estimated First Response	Estimated Work Around	Estimated Resolution Time

Priority 1	High	Occurrences that lead to: 1. Errors or outage to the Website which restricts the users from viewing the Website. 2. Seriously could affect the services of a large number of users. 3. Could affect service delivery of an internal business-related event, product, or service.	Within 1 Business Hour	Within 2 Business Hour	Within 1 Business Day
Priority 2	Medium	Occurrences that lead to disruption in a particular component of the Website, which not necessarily hampers all visitors from viewing the Website. (Ex: Inner Page Error, Broken URL Link, Web Process inoperative).	Within 2 Business Hour	Within 1 Business Day	Within 2 Business Day
Priority 3	Low	Reported errors or other problems that disable specific non-essential functions; error condition is not critical to continuing operation	Within 1 Business Hour	Within 2 Business Day	Within 5 Business Day
Priority 4	Up gradation Request	Up gradation of new web-based module on to the existing Website	Depends on the scope	Depends on scope of work	Depends on scope of work

Yours sincerely,

Md. Fazle Rabbi, Assistant General Manager (AGM), Sales & Marketing

Aamra Infotainment Limited

B-3, House - 73, Road - 04, Block - C, Banani C/A, Dhaka, Bangladesh

RFP FORM:

Having examined the terms, conditions, instructions and specifications included in the RFP documents, we the undersigned offer to supply, deliver and commission the items in conformity with the said conditions and specifications.

We undertake to complete the job within the period as specified in tender schedule. We agree to abide by this bid for the period of 365 (Three Hundred and Sixty-Five) days from the RFP submission date mentioned by the bank.

Until a formal contract is prepared and executed, this bid together with your written acceptance thereof in your notification of award shall constitute a binding contract between us.

Dated: 20th May, 2025

Signature

**Seal of the authorized official
and round seal of the company**

Md. Fazle Rabbi,

In the capacity of : Assistant General Manager (AGM)

Duly authorized to sign bid for and on behalf of Aamra Infotainment Limited (AIL)

Witnesses with address:

1. Md. Maruf Jahan, Manager, Sales & Marketing, AIL
2. Md. Saiful Islam, Executive, Sales & Marketing, AIL

Section 9 – NON DISCLOSURE AGREEMENT

This AGREEMENT is made and entered into by and between the Prime Bank PLC. (“Bank”) and **Aamra Infotainment Limited (AIL)** and is effective upon execution by both parties.

WHEREAS, the Company requires access to many forms of information and materials considered proprietary and confidential to the Prime Bank PLC.; and

WHEREAS, the Company requires access to this information to propose, plan, develop, implement and maintain Bank systems and/or for successful completion of the Scope of Work; and

WHEREAS, information and materials includes, but is not limited to, [revise to fit] access to secure facilities, systems, technologies, information infrastructure, including network architecture; server environment, services and hardware standards. The Company must comply with the Bank, and government regulations in accessing and using Information.

THEREFORE, IT IS AGREED AS FOLLOWS:

The Bank will allow the Company access to all files and records required to perform Company’s duties (“Duties”) concerning the System.

The Company agrees to limit the use of this Information for the purposes (“Purposes”) of developing, implementing and warranty of other Solutions.

The Company agrees that access to Information will be limited to approved employees and subcontracted employees (“Authorized Personnel”). The Company agrees that it will provide the Prime Bank PLC. with a list of employees to be authorized for each agreed upon work order. Company agrees that all Authorized Personnel shall be informed of the provisions of this Agreement and shall first agree to comply with the revisions of this Agreement before Company permits such Authorized Personnel to have access to any Information.

The Company shall obtain written authorization from the Bank prior to permitting any Consultant or sub-consultant employees to have access to Information. The Bank and Company will screen all contracted or subcontracted employees whom the Company requests to have access to Information. Screening may include a criminal record background investigation and others. At the Bank’s sole discretion, the Bank may deny authorization to an individual because of criminal record or other pertinent reason. Authorization can be revoked immediately for anyone

reasonably believed to be violating access/disclosure regulations.

The Bank agrees to further limit access to Information to Authorized Personnel. No copies of Information shall be made except as clearly necessary to accomplish purposes of this agreement.

Company agrees to destroy copies of such Information when copies of such Information are no longer needed for Purposes of this Agreement. The Company will not disclose any Information in a form which can identify an individual in any report or documentation, except for purposes of this Agreement when working with Department Name, Department personnel, or authorized personnel on the list.

The Company agrees to take all necessary reasonable precautions to protect Information from unauthorized access, alteration, or destruction. Information and programs to access it must be stored in secure, locked containers. Company programs shall employ all current safeguards to prevent unauthorized access to disk and tape files. Company Personnel shall not bypass or override security provisions in existing systems and networks in the course of their work and the programs they develop shall conform to existing security provisions.

In the event that Company deems it necessary, for the purposes of this agreement, to disclose Information to any sub-contractor, the Company shall notify the Bank and secure the written agreement of the sub-contractor to comply with all terms of this Non-Disclosure Agreement as if it were the Company named herein. The Bank shall have the right, at any time, to monitor, audit, and review the activities, policies, records, and documents of the Company and its sub-contractor in implementing this Agreement in order to assure compliance therewith.

Since this Agreement provides access to Information on an ongoing basis, the Bank reserves the right to immediately suspend furnishing Information under this Agreement when it is determined by the Bank that any rule, policy, procedure, or regulation described or referenced herein is violated or appears to be violated. The Company shall not be liable for any deficiencies in the performance of its duties caused by the suspension provided it is later determined by investigation of the Bank that the Company did not violate this agreement. Notice of any such suspension shall be provided to Company in writing by the Bank.

It is hereby understood and acknowledged by the parties that any breach of their obligations detailed in this Agreement may cause the other damage and that monetary relief will not be in every case an adequate remedy for any such breach. Accordingly, in the event of any such breach the damaged party may seek injunctive relief from such breach or threatened breach of this Agreement.

The Company shall immediately return and redeliver to Bank all tangible material embodying any confidential information provided hereunder and all notes, summaries, memoranda, drawings, manuals, records, excerpts or derivative information deriving therefrom, and all other

documents or materials ("Notes") (and all copies of any of the foregoing, including "copies" that have been converted to computerized media in the form of image, data, word processing, or other types of files either manually or by image capture) based on or including any confidential information, in whatever form of storage or retrieval, upon the earlier of (i) the completion or termination of the dealings between the parties contemplated hereunder; (ii) the termination of this Agreement; or (iii) at such time as the Bank may so request; provided however that the Company may retain such of its documents as is necessary to enable it to comply with its reasonable document retention policies. Alternatively, the Company, with the written consent of the Bank may (or in the case of Notes, at the Company's option) immediately destroy any of the foregoing embodying confidential information (or the reasonably non-recoverable data erasure of computerized data) and, upon request, certify in writing such destruction by an authorized officer of the Receiving Party supervising the destruction).

IN WITNESS HEREOF, the Parties hereto have executed this Agreement as of the Effective Date and agree to be legally bound by all terms and conditions contained herein.
